KENTUCKY ANNUAL HOSPICE SERVICES REPORT

INTRODUCTION

The Kentucky Department for Public Health announces the release of the 2000 Kentucky Annual Hospice Report. The Health Policy Development Branch, Division of Epidemiology and Health Planning, is responsible for the hospice utilization data collection and reporting set forth in 902 KAR 20:008, revised February 10, 1987. This report is the most recent official hospice data published by the Cabinet for Health Services.

The report covers the period from January 1, 2000 to December 31, 2000 for all Kentucky hospice programs. In addition, the 2000 Kentucky Annual Hospice Report highlights state hospice services and populations between the years of 1995-2000. The first edition of the annual report was in 1995.

The report contains four sections:

- **Section I:** Contains hospice census data by Area Development District (ADD), county and service type.
- **Section II:** Contains utilization of staff data by Area Development District (ADD), and county.
- **Section III:** Primary Diagnosis of Hospice Patients which provides a state summary of diagnosis data.
- **Section IV:** Primary Diagnosis of Hospice Patients listed by program name, counties served and age cohorts. Counties served by the program are also listed.

2000 Hospice Report Summary: There were 10,782 Kentucky hospice patients served in 2000. Kentucky hospices admitted 9,106 patients. Since 1995, the overall trend of hospice referrals, admissions, and patients served has steadily increased. Also, 11,581 patients were referred to hospice services and were admitted at a rate of 78 admissions per 100 referrals. Kentucky hospices have served a total of 47,231 patients between 1995 and 2000.

In 2000, hospitals were responsible for 40% (4,537) of all referrals. Physicians accounted for 35% of all hospice referrals. This trend has remained consistent since 1995.

Since 1995, the most reported malignant diagnosis for Kentucky hospice patients is respiratory/intrathoracic cancer, with heart disease being the most reported non-malignant condition.

There were 364,783 total visits in 2000. The majority of visits were RN/LPN (148,226) and Aide/Home Maker (121,287) visits.

Other Notes:

To ensure data accuracy, this office is in the process of evaluating certain data collection and data analysis methodologies. The 2000 Kentucky Annual Hospice Report does not contain data regarding length of stay or comparative referral source information.

The Kentucky Department for Public Health is proud to provide the online version Kentucky Annual Hospice Reports. We hope you will find the information contained in our reports to be informative and easy to navigate. The 2000 report will also be available on-line in the near future. The web address is: <http://publichealth.state.ky.us/data-warehouse.htm>

Please feel free to contact our office with your questions, concerns, or for further information.

2000 Kentucky Hospice Report Observations

Malignant Neoplasms (See Charts in Section IV)

In 2000 there were 6,283 hospice patients diagnosed with a malignant condition. The most frequently reported primary cancer diagnosis was Respiratory/Intrathoracic cancer, at 38.5% (2,420 cases) of all cancer diagnoses for all age groups. This trend has remained constant over the last six years over the last six years. Digestive organ malignancy was the second most frequently diagnosed malignant condition for the hospice population in 2000 at 22% (1,383 cases). These two conditions accounted for over half of all malignant diagnoses in 2000.

Since 1995, Respiratory/Intrathoracic cancer has been the prevailing malignant diagnosis for the Kentucky Hospice population. The 18-44 age group accounted for 25.4% of all Respiratory/Intrathoracic cases in 2000.

Non-Malignant Diagnoses (See Charts and data in Section IV)

There were a total of 3,811 non-malignant cases in 2000. Heart disease continues to be the most reported non-malignant condition, with 26% (970 cases) of all non-cancer diagnoses in 2000. Consistently since 1995, the 65+ age group has reported this condition more frequently than all other age groups.

In 1995, 162 (6.7%) of all non-malignant cases were AIDS cases. In 2000 there were 33 AIDS cases, which represents a 79.62% decrease in AIDS diagnoses in the hospice population. There has been a significant reduction in the number of hospice patients with an AIDS diagnosis, when comparing 1995 and 2000. Of all AIDS diagnoses in 2000, 29.6% were in the 18-44 age group.

Although the number of people diagnosed with HIV/AIDS continues to increase in the general population, advancements in treatment and drug therapy have likely decreased the need for hospice services for AIDS patients over this time period.

Admissions, Referrals, Patients Served (See Charts in Section I)

There were 11,581 referrals to hospice in 2000, a 20% increase between 1995 and 2000. In 1995 there were 8,491 hospice patients served and 10,782 served in 2000, a 27% increase.

This map of Kentucky displays all 120 counties, each labeled with its name. Overlaid on the county map are several regional planning areas, each identified by a circled number: 1 (Pennyrile), 2 (Purchase), 3 (Kentuckiana Regional Planning Development Agency), 4 (Lincoln Trail), 5 (Green River), 6 (Northern Ky.), 7 (Bluegrass), 8 (Buffalo Trace), 9 (Flvc), 10 (Gateway), 11 (Big Sandy), 12 (Ky. River), 13 (Cumberland Valley), and 14 (Lake Cumberland). Major waterways are shown as lines with arrows indicating flow: the Green River, Kentucky River, and Barren River. Other labeled features include the Purchase area, Lake Cumberland, and the Cumberland Valley. A scale bar in miles (0 to 100) and a north arrow are located in the bottom right corner.
